

PERSONAL INJURY CAUTION

Appropriate service methods and proper repair procedures are essential for the safe, reliable operation of all motor vehicles, as well as for the personal safety of the person doing the repair. There are many variations in procedures, techniques, tools and parts for servicing vehicles, as well as in the skills of the people doing the work. This manual cannot possibly anticipate all such variations and provide advice or precautions for each. Anyone who deviates from the instructions provided in this manual must ensure their own safety and preserve the safety and integrity of the vehicle. The following list contains general precautions that should always be followed while working on a vehicle.

- **Safety stands are required whenever a procedure calls for underbody work.**
- **Do not smoke when you work on a vehicle.**
- **To prevent serious burns, do not touch any hot metal parts.**
- **Set the parking brake when you work on the vehicle.**
- **Turn the ignition switch OFF unless a procedure states otherwise.**
- **The engine may operate only in a well-ventilated area.**
- **Avoid moving parts when the engine is running.**
- **Safety glasses must be worn for eye protection.**

LANOS

Service Manual

FOREWORD

This manual includes procedures for maintenance, adjustment, service operations, and removal and installation of components for the LANOS vehicle.

When reference is made in this manual to a brand name, number, or specific tool, an equivalent product may be used in place of the recommended item.

All information, illustrations and specifications contained in this manual are based on the latest product information available at the time of publication approval. The right is reserved to make changes at any time without notice.
